

DELAWARE'S BIG PEACH CROP.

More Peaches than Can Be Profitably Sold on Hand, Even the Most Dedicated

WILMINGTON, Aug. 30.—The bottom

and some of the growers are beginning to look upon the great Delaware fruit as a delusion and a snare, so far as profit is concerned. There is no end of peaches and they are being thrown into the market. Nonetheless, the "put up" peaches by thousands of jars and the demand has nearly ceased. The peaches ever grown on the peninsula have sold for 40 cents a basket. A few years ago \$1.50 was not an unusual price for them.

So far this year, it is estimated, the Delmar Railroad has carried to market about 2,000 baskets. Then the canners and dryers have consumed much of the fruit. One firm of canners at Dover alone has absorbed about 100 baskets. For some of their fruit, the pickers are paid 65 cents a basket; for the rest, that was three weeks ago. The same firm also put up about 5,000 baskets of pears. The canners and dryers are paid 65 cents a bushel for water or the Maryland peaches or peninsula. They will probably add 1,000 baskets to the number, and there are perhaps 1,000,000 more baskets to come. The season will not extend far into the winter. The fruit is not sold in New Jersey, fifty miles south of this city.

The great yield of fine ears, plums, and apples on this property is another feature, to say nothing of the small peach market. All these causes have tended to force the bottom out of the peach market.
